

Model 365 UV Curing System

- Model 365 UV curing system uses high intensity UV light at 365 nm for curing dicing tape.
- The high UV intensity and ease of use allow quick and easy lift-off of samples after dicing.
- The system is installed in the AggieFab Nanofabrication Facility. If you are interested in using this system, please contact the trainer listed on our website: <https://aggiefab.tamu.edu/training/>.

➤ Key Features

- 420 mm exposure diameter
- Instant warm-up time
- Nitrogen purge capability
- Touch screen display
- Programmable purge & cure time
- Four selectable power settings
 - 50%, 66%, 75% and 100%
- 100 mW/cm² intensity at 365 nm
- Most dicing tapes cured in 5 seconds
- Safety interlocked UV operation
